

## Module 2

# Crossing Through

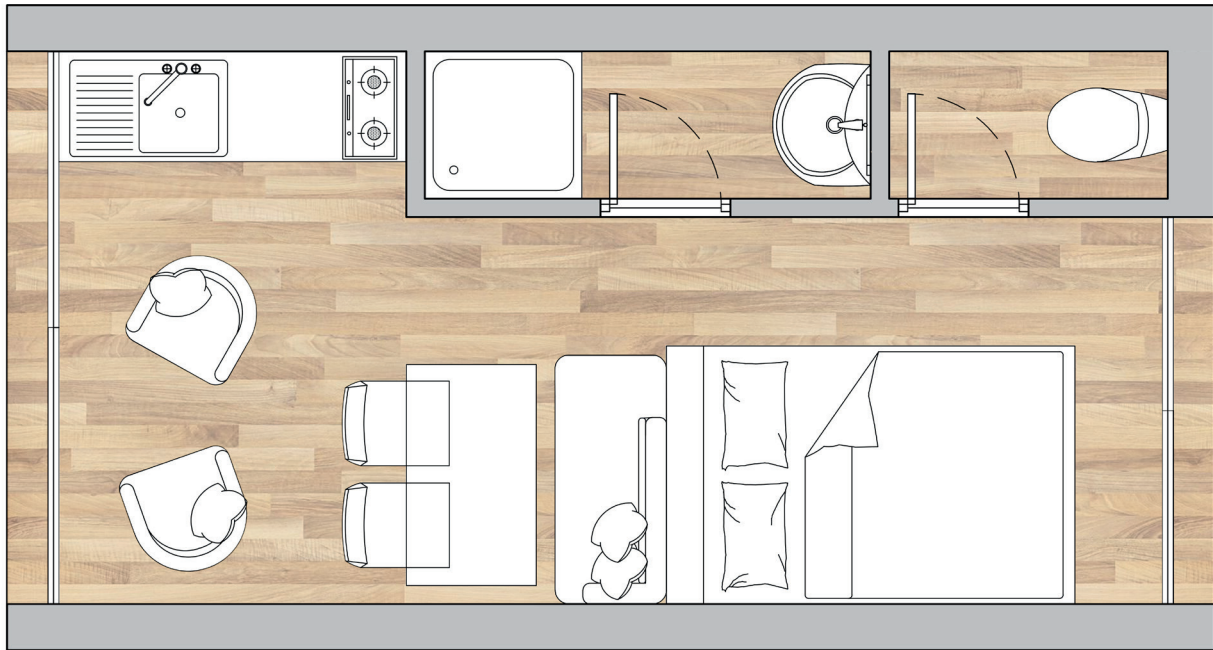

**A** ERIC  
ARSENAULT  
ARCHITECTURE

### description

By distributing the wet areas along the length of the home, the living room can be distinguished from the sleeping area, the two being separated by a storage unit.

We thus obtain two distinct sub-spaces - living room/kitchen and bedroom/bathrooms. A second bay window can be opened on the bedroom side with a through view.

Floor plan

Module Composition

- Fully equipped kitchen
- Bathroom
- Double bed
- Passive solar natural heating
- Double bay window
- Outdoor patio
